August, 1968.

To the Chairman and Members of the Council,

Lady and Gentlemen,

I have the honour to present the twenty-first Annual Report since the inception of the scheme of Divisional Health administration.

Under the Divisional Health scheme your Medical Officer of Health is also Divisional Medical Officer for the West Riding County Council's local health services and with the amalgamation of the former Todmorden and Brighouse divisions he now has similar functions and responsibilities in the seven other districts in the enlarged division, which includes all the county area served by the Halifax hospitals.

The birth rate in 1967 was 15.6 per thousand. This is the highest level recorded in the past 15 years, but nevertheless it is still well below the rate for the rest of the country. The infant mortality rate was lower, but there was an abnormal number of still births this year.

The death rate at 10.1 was lower than usual, principally because there were very few deaths from cancer or respiratory disease. Once again the most common cause of death was coronary artery disease, but in younger people motor vehicle accidents are now the most important cause of both mortality and physical disability.

Measles was the only significant infection in Ripponden in 1967, a further 65 cases being notified. It is to be hoped that the vaccines which are now available will prevent this disease as effectively as the other infections which used to be a hazard in childhood. Since the introduction of routine immunisations and vaccinations, Diphtheria and Polio have been virtually eliminated and there has been a dramatic fall in the incidence of Whooping Cough. In the 10 year period 1948-57, 187 cases of Whooping Cough were notified in Ripponden, whereas in the following 10 years, after the introduction of the vaccination scheme, only 10 cases were notified.

Sampling of untreated farm bottled milk continued throughout the year and most of the producer-retailers in the district are co-operating by submitting regular bulk samples from their herds. Only four of these samples were positive on examination for Brucellosis, but over three hundred further samples were taken in order to identify infected animals and also to check newly purchased and newly calved cows. This scheme has been very successful in ensuring that milk sold in the district is free from Brucella infection, but testing milk alone cannot eradicate the disease from dairy cows and does not, of course, give any indication of the extent of infection which exists in beef cattle or young stock on the farms. The Ministry of Agriculture, Fisheries and Food has now embarked upon a scheme for registering herds which are free from infection as a preliminary to eradication of Brucella infection, a policy which has been advocated by Health Departments for many years.

The Chiropody service which had previously been conducted by the Ripponden Old People's Welfare Committee carried on as before with the chiropodists now claiming their fees directly from the County Council. During the year a total of 61 persons received 300 treatments in the Centre, and a further 44 persons who were unable to attend received 221 treatments at home. These figures show a small increase compared with the previous year.

All the Council houses built in Ripponden before the war and immediately after the war were traditional family houses, but in 1963 it was decided to build some special dwellings for old people for the first time. This venture was so successful that two further blocks of flats were built the following year and since then the demand for this type of accommodation has continued to grow. The Council is now planning to build a further group of bungalows on a central site adjoining the County Council's new home for the aged. The County Council is co-operating in this scheme and will contribute towards the communal facilities and the provision of a Warden to give over-sight to the bungalows. This project will go a long way towards meeting the needs of the elderly and infirm in the district.

In conclusion, I wish to thank the members of the Council for their kindness, patience and co-operation and to thank Mr. Sharples, Public Health Inspector and Surveyor, who retired in July and to Mr. Goulden, his successor, for their kindness and efforts to give me the sanitary circumstances of the area, and indeed to all your officials with whom I made contacts, personal and official.

I am,

Yours faithfully,

N. E. GORDON, M.B., B.Ch., D.P.H.,

Medical Officer of Health.

SECTION II.

General Provision of Health Services.

A. Hospitals.

There is no hospital in Ripponden. Patients requiring hospital treatment are referred as a rule to hospitals under the administration of the Halifax Area Hospitals Management Committee (National Health Service). Included in this group are the Halifax General Hospital, Royal Halifax Infirmary, St. John's Hospital (for aged and chronic sick), Northowram Hall Hospital (for infectious diseases), Todmorden Fielden Hospital, and Todmorden Stansfield View Hospital (for mentally subnormal patients).

Maternity beds are available at the Halifax General Hospital. Priority in booking is given to abnormal cases, mothers expecting their first child, and mothers with unsatisfactory home conditions.

Special hospitals (e.g. Mental Hospitals, Orthopaedic Hospitals, Tuberculosis Sanatoria, etc.) outside the Halifax area are available when required; they are situated in various parts of the so-called "Leeds Hospital Region" which in fact extends into all three Ridings.

B. Ambulance Facilities.

The County Ambulance Service covers the Ripponden district through the Group Control at Birkenshaw and the Divisional Depot at Brighouse and it may be contacted by telephone No. Bradford 682211 or Halifax 62191. There is an agency agreement with Halifax County Borough whereby patients being transferred to and from Halifax Hospitals only are taken in Halifax ambulances, the telephone number of the station being Halifax 60606.

C. Laboratory Facilities.

These are provided by the Public Health Laboratory Service at laboratories in Wakefield and Bradford and by the Regional Blood Transfusion Service at Leeds. There are also facilities for the examination of clinical specimens, including cervical smears, at the Royal Halifax Infirmary.

D. Issue of Anti-toxin, etc.

Supplies of diphtheria and tetanus anti-toxin are available at the Northowram Hall Hospital and at the Royal Halifax Infirmary for issue to medical practitioners requiring them.

By arrangement with the Regional Hospital Board supplies of tetanus anti-toxin are also kept at the Divisional Health Office,

The Medical Centre, Todmorden, for the use of medical practitioners in the Division. A supply of reagents for diphtheria, whooping cough and tetanus immunisation is also available free of charge to private practitioners who have undertaken to participate in the West Riding County Council's schemes of immunisation. Poliomyelitis vaccine is also issued, in accordance with the approved arrangements.

SECTION III

W.R.C.C. PREVENTIVE HEALTH SERVICES.

A. Clinics and Treatment Centres.

The Maternity and Child Welfare Clinic is held at the Zion Congregational Sunday School, Ripponden, every Tuesday afternoon, and is attended by the Health Visitor.

B. Care of Mothers and Young Children.

Ripponden Child Welfare Centre.

Total number of children who attended during the year	82
Total number of attendances	848

Home Visiting of Infants.

Total number of live births to Ripponden mothers	77
Number of first visits to children under 1 year	62
Total number of visits to children under 1 year	288
Total number of visits to children aged 1—2 years	217
Total number of visits to children aged 2—5 years	318

Provision of Welfare Foods, etc.

National Dried Milk, cod liver oil, orange juice, etc., are distributed at the Centre and a variety of brands of dried milk and other infant foods are also sold at the Child Welfare Centre for the convenience of mothers.

Care of Premature Infants.

Special equipment is available for use in the home in cases requiring it. Portable incubators are available at both the Halifax and Brighthouse Ambulance Stations should it be necessary to transfer a premature infant to hospital.

Provision of Maternity Outfits.

These are provided free to mothers preparing for confinement in their own homes.

C. Professional Nursing in the Home.

The West Riding County Council is responsible for both home nursing and midwifery in this area. There is one full-time Home Nurse and one full-time Midwife working in Ripponden and neighbouring parts of the Sowerby Bridge U.D.

Midwifery Service.

Number of home confinements	30
Number of hospital confinements	52

Analgesia.

The Ripponden Midwife is trained in the administration of both trilene and gas and air analgesia and is provided with the necessary equipment. Analgesia is available to all mothers desiring it subject to satisfactory medical examination by a doctor.

D. Health Visitor.

The duties of the Health Visitor are combined with those of School Nurse. In pursuance of the National Health Service Act the scope of this service includes home visiting for the purpose of giving advice as to the care of children, of persons (including adults) suffering from illness, and of expectant and nursing mothers. The Health Visitor also gives advice in the home as to measures necessary to prevent the spread of infection.

E. Home Helps.

In accordance with the National Health Service Act, the County Council provide domestic help for households "where such help is required owing to the presence of any person who is ill, lying-in, an expectant mother, mentally subnormal, aged, or a child not over compulsory school age."

16 cases were attended in Ripponden during 1967 in the following categories: Aged persons and illness. The total number of hours worked by home helps was 2,079 as compared with 2,185 in 1966.

F. Care and after care.

Special provisions are in operation for the care and after care of patients suffering from tuberculosis, mental illness or sub-normality, venereal disease, and other illness.

Tuberculosis.

A full time tuberculosis health visitor is employed in the division. She attends the chest clinic at the Halifax Royal Infirmary and has helped to forge a valuable link with the hospital services. She is also responsible for visiting patients at home and helps to trace and supervise their contacts. In 1967 597 visits were paid to 135 households in the division.
